Chapter 1 - Overview

1.1 B2 Fleet EMV Test Cards - Purpose

This set of test cards is designed for clients who wish to perform internal development, testing and training of EMV fleet card solutions.

1.2 Target Audience

This document is intended for integrators, developers, POS vendors and merchants who wish to develop an EMV solution that supports EMV fleet functionality.

Chapter 2 - Fleet Cards Overview

2.1 Liability Shift and EMV

The U.S. market is preparing for the October 2020 Automatic Fuel Dispenser (AFD) EMV counterfeit liability shift.

At the time of this document's publication, the card brands have not yet established certification processes specific for the acceptance of fleet cards.

MERCHANTS ARE ENCOURAGED TO WORK WITH THEIR ACQUIRER, TERMINAL DEVELOPERS AND SUPPLIERS TO DEFINE, DEVELOP AND TEST EMV TERMINAL CONFIGURATIONS FOR THE ACCEPTANCE OF EMV FLEET CARDS.

2.2 Fleet Card Industry Standards

No single industry organization exists to define specifications and guidelines on how stakeholders should prepare for the liability shift. However, Conexxus www.conexxus.org and the US Payment Forum <https://www.uspaymentsforum.org/> are working together to define a common standard for EMV based fleet cards.

2.3 Fleet Service Indicators (FSI)

Due to the co-existence of magnetic stripe and chip terminals, the simplest way to incorporate fleet prompts is to mirror the process in use for today's existing magnetic stripe environment, by adding Fleet Service Indicators to the chip content.

The current standard uses the last three non-zero digits of the magstripe Track 2 Discretionary Data to specify fleet information which is used to determine which prompts should be presented to the cardholder.

Layout:

- Digit 1 - Reserved for Future Use
- Digit 2 - Service Enhancement Indicator (SEI) - see below
- Digit 3 - Service Prompt (SP) - see below

Prompts:

It is important to consult your acquirer to determine any specific (test) host values for such things as Vehicle Number or Driver ID, etc.

2.4 Fleet Cards - Mastercard & Visa

The definition and terminology for the prompts differs, though only very slightly, from card brand to brand. The Visa and Mastercard Fleet Service Indicator mapping are shown below.

Fleet Service Indicator - Visa Fleet cards

The Fleet Service Indicator is located in the last 3 non-zero digits of the Track 2 Discretionary Data. This indicator is present on both the magstripe and in the Track 2 Equivalent Data - EMV Tag ('57').

Field Position 1 - Reserved for Future Use; default value is 0 (zero)

Field Position 2 - Service Enhancement Indicator

- 0 = No Restriction - i.e. fuel, maintenance, non-fuel purchases
- 1 = Fuel and maintenance-only purchases
- 2 = Fuel-only purchases
- 3-9 = Reserved

Field Position 3 - Service Prompt

- 0 = Reserved (no prompt required)
- 1 = Identification (ID) and odometer reading
- 2 = Vehicle ID and odometer reading
- 3 = Driver ID and odometer reading
- 4 = Odometer reading
- 5 = No prompt
- 6 = ID1 (six-digit vehicle, driver or generic ID)
