1.2.2 CTLS: CVM List - Interac Flash, AID A0000002771010 (Flash).....	3

CAUTION

Multiple consecutive incorrect PIN entry attempts may result in the card being blocked.

This is known as being 'PIN Blocked'.

If this occurs, it will no longer be possible to enter an Offline PIN, which will cause all future transactions to be declined.

***** It is not possible to unblock a 'PIN Blocked' card *****

IMPORTANT NOTICES

The Interac Flash test cards in this set have a '001202' BIN range. These cards are supported by all Canadian processors but are not yet supported by all U.S. and International processors.

****** Check with your acquirer account representative to determine if this Interac Flash BIN range is supported by their development host. If your processor does not yet support Interac Flash, the card will function properly at the POS device but it will not obtain a host approval. ******

IMPORTANT TECHNICAL NOTICE from Interac – ACQUIRERS' SUPPORT

Link to Interac document: [Interac Letter - Issuer simulator setup for Flash Cards](#)

"When using the contact interface in an Acquirer test environment, the Issuer simulator must be configured to return value '88 40' in ARPCrc response (ARPCrc byte 1 bits 6-3 should be set to zero).

Unless issuer simulator is configured to return '88 40', a contact transaction may block the card."

--- B2 will charge to replace cards blocked in this manner ---
