Revision History

Version	Date	Revisions
1.00	December 09, 2017	• Initial document release
1.10	December 14, 2017	• Recommended transaction $value updated for cards 13, 15, 16
1.20	May 30, 2018	• Renumbered Test Cases: CD.MMCL.C03-T01 corrected to CD.MCCL.C03-T01 CD.MMCL.C03-T02 became CD.MCCL.C03-T03 • Updated Test Cases: CD.MCCL.C03-T01 CD.MCCL.C08-T01 CD.MCCL.C11-T01 CD.MCCL.C11-T03 • New Test Cases: CD.MCCL.C03-T02
1.30	June 1, 2018	• Removed Test Cases: CD.MCCL.C08-T03 CD.MCCL.C12-T03 CD.MCCL.C12-T04 • Renumbered Test cases: CD.MCCL.C08-T04 became CD.MCCL.C08-T03 • Updated Test Cases: CD.MCCL.C08-T02 CD.MCCL.C08-T03 CD.MCCL.C09-T01 • Card version numbers (profile table, Tag data) updated to match physical card version - all are currently v4.0. • Tags 82, 9F07, 9F69: interpretation of bit values added
2.00	August 20, 2018	• TC03 updated to v5.0 - Tag 57 modified
3.00	September 27, 2018	• Tag 82 (AIP) updated on non-Visa cards • Discover cards (TC12, TC13) - Expiry date changed to 23/12 • DNA Card (TC14) - Expiry date changed to 25/12
3.10	December 13, 2018	• TC03 documentation updated to reflect Dual-Funding
4.00	March 11, 2019	• TC03 updated to v6.0 - Discretionary data modified
4.01	June 7, 2019	• Card set on which tests are based renamed to "USA Debit EMV Test Card Set". No change to cards themselves.
5.00	June 21, 2019	• TC16 updated to v5.0 - Language indicator modified

Table of Contents

Chapter 1 - Overview

1.1   USA Debit EMV Test Plan - Purpose

This test plan is designed for clients who wish to utilize the USA Debit EMV Test Card Set, provided by B2, to perform internal testing, training and/or User Acceptance Testing (UAT) with U.S. processors.

The test plan benefits are derived from having a defined and repeatable testing methodology. In addition, the test plan includes test cases that test many functions which are required from a practical standpoint when releasing a debit-capable EMV POS Solution into the U.S. marketplace.

1.2   Target Audience

This document is intended for integrators, developers, POS vendors and merchants who wish to develop an EMV POS Solution that supports EMV contact and contactless debit functionality.

This document assumes that the user has a good understanding of POS credit and debit transaction processing in the U.S. and a general understanding of EMV and contactless smartcard concepts.

1.3   System Requirements

This is a standalone document that may be used with any POS architecture - e.g. standalone, semi-integrated or fully-integrated.

Chapter 2 - Implementing U.S. Debit

2.1 U.S. Common Debit Scenarios

To meet the requirements of the Durbin amendment to the Dodd–Frank Wall Street Reform and Consumer Protection Act ("Durbin regulations"), and to provide merchants and/or acquirers the choice to route transactions from debit and prepaid card programs via unaffiliated networks; Visa, Mastercard, Discover and Debit Network Alliance (DNA) have introduced the following AIDs (commonly referred to as the "U.S. Common Debit AIDs").

U.S. Common Debit AIDs

Brand	Scheme	AID
Discover	U.S. Common Debit	A0000001524010
DNA	U.S. Common Debit	A0000006200620
Mastercard	U.S. Maestro	A0000000042203
Visa	Visa Common Debit	A0000000980840

Other individual debit networks (in addition to DNA) may offer their own U.S. Debit AIDs that will reside on non-Visa, non-Mastercard and non-Discover branded cards.

Visa, Mastercard and Discover branded chip cards, issued in the U.S. under debit and prepaid card programs, will support both a U.S. Common Debit AID and a Global Debit AID (either standard Visa AID, standard Mastercard AID, Maestro AID or standard Discover AID).

- If a Global Debit AID (Visa, Interlink, Mastercard, Maestro or Discover) is used to initiate the chip transaction, the transaction must be routed via the corresponding card brand network. The network used is based on the AID selected.
- If a U.S. Common Debit AID is used to initiate a chip transaction, the resulting transaction may be routed via any of the card brand networks, or any unaffiliated network that has executed the necessary access agreement with Visa, Mastercard or Discover.

For both contact and contactless transactions, EMV POS Solutions may use the standard Application Selection process described for all EMV transactions. However, the merchant may filter the resulting Candidate List to remove multiple AIDs which access the same underlying funding account, such that only one AID per unique funding account remains. EMV POS Solutions must <u>not</u> assume that if a U.S. Common Debit AID is present, that this AID can be automatically selected to the exclusion of all other AIDs on the card, as those AIDs may relate to alternative products which the cardholder may wish to use (e.g. a credit product which is issued together with a debit product).

All AIDs which relate to debit or prepaid programs can be identified in the data read during Application Selection. The presence of the following two data elements identifies the AID as relating to a U.S. Debit or prepaid program:

- **Issuer Country Code (Tag 5F55)** - Two alpha digits with a value of 0x5553 ("US")
- **Issuer Identification Number (Tag 42)** – Contains the Bank Identification Number (BIN) (i.e. the first 6 digits of the PAN).

There are three possible situations that must be handled:

1. The card has two AIDs where these data elements are present and the values of the Issuer Identification Number (IIN) are the same for both AIDs (**Scenario One below**):

   - The EMV POS Solution should assume that the AIDs with the same IIN access the same underlying funding account and therefore can remove one of those AIDs from the Candidate List.
   - For contact and contactless transactions, where there are only 2 AIDs present in

the card (1 Global AID and 1 U.S. Common AID), the EMV POS Solution may automatically select the single remaining AID in the Candidate List in accordance with Final Selection processing (section 2.5 Final Selection Processing below). The card has more than 2 AIDs where these data elements are present and 2 of the AIDs have the same value for the Issuer Identification Number (IIN). In this scenario there will also be one or more other AID(s) present on the card that have either no IIN or a different IIN from the pair of AIDs with the same IIN **(Scenario Two below)**:

- The EMV POS Solution should assume that the AIDs with the same IIN access the same underlying funding account and therefore can remove one of those AIDs from the Candidate List.
- For contact transactions, the EMV POS Solution should present the remaining Candidate List choices to the cardholder in accordance with Final Selection processing (section 1.4.3 below).
- For contactless transactions, the EMV POS Solution should automatically select the AID in the Candidate List that has the highest Application Priority Indicator (Tag 87) value.

2. When a card has two or more pairs of AIDs where these data elements are present and for each pair, both AIDs have the same IIN **(Scenario Three below)**:

- For each pair of AIDs with the same IIN, the EMV POS Solution should assume that the AIDs with the same IIN access the same underlying funding account and therefore can remove one of those AIDs from the Candidate List - leaving only one AID for each IIN.
- For contact transactions, the EMV POS Solution should present the remaining Candidate List choices to the cardholder in accordance with Final Selection processing (section 1.4.3 below).
- For contactless transactions, the EMV POS Solution should automatically select the AID in the Candidate List that has the highest Application Priority Indicator (Tag 87) value.

U.S. Common Debit Scenarios

Scenario	AID	Country Code Tag 5F55	IIN Tag 42	Candidate List Choice for the Merchant
One	Card accesses single debit funding account: USA Debit Test Cards 01, 05,12			
Global Debit AID	TC 01 - A0000000031010 TC 05 - A0000000041010 TC 12 - A0000000153010	US	TC 01 - 476173 TC 05 - 541333 TC 12 - 651000	Merchant may decide which AID to select based on their preferred routing choice: - Global AID – may only be routed to Visa, Mastercard or Discover (any supported CVM may be used) - U.S. Common Debit AID – may be routed to any of the global networks or any of the supported debit networks (any supported CVM may be used)
U.S. Common Debit AID	TC 01 - A0000000980840 TC 05 - A0000000042203 TC 12 - A0000000154010	US	TC 01 - 476173 TC 05 - 541333 TC 12 - 651000	
Two	Combo card accessing a credit account and a single funding debit account: USA Debit Test Cards 03, 09			
Global Credit AID	TC 03 - A000000003101001 TC 09 - A0000000041010	n/a	n/a	Global Credit AID will remain in the Candidate List for cardholder selection.

U.S. Common Debit Scenarios

Scenario	AID	Country Code Tag 5F55	IIN Tag 42	Candidate List Choice for the Merchant
Global Debit AID	TC 03 - A000000003101002 TC 09 - A0000000043060	US	TC 03 - 476173 TC 09 - 679999	Merchant should decide on either the Global AID or the U.S. Common Debit AID based on their preferred routing choice: • Global AID – may only be routed to Visa, Mastercard or Discover (any supported CVM may be used) • U.S. Common Debit AID – may be routed to any of the global networks or any of the supported debit networks (any supported CVM may be used)
U.S. Common Debit AID	TC 03 - A0000000980840 TC 09 - A0000000042203	US	TC 03 - 476173 TC 09 - 679999	
Three	Card accesses two debit funding accounts – Accounts have different IINs: USA Debit Test Card 11			
Global Debit AID 1	TC 11 - A0000000043060	US	5413333	
U.S. Common Debit AID 1	TC 11 - A000000004220301	US	541333	Merchant should choose either the 2 Global AIDs or the 2 U.S. Common Debit AIDs based on their preferred routing choice: • Global AIDs – may only be routed to Visa, Mastercard or Discover (any supported CVM may be used) • U.S. Common Debit AIDs – may be routed to any of the global networks or any of the supported debit networks (any supported CVM may be used)
Global Debit AID 2	TC 11 - A0000000041010	US	679999	
U.S. Common Debit AID 2	TC 11 - A0000000004220302	US	679999	

2.2   Application Selection for U.S. Debit with Cardholder Verification Handling

For traditional magstripe debit transactions, merchants can decide when selecting the card type what cardholder verification to use for a debit transaction. This may be either to:

1. Prompt the cardholder to enter the PIN (commonly referred to as "PIN Preferring Merchants"). The cardholder can, in some implementations, bypass the PIN to allow for a signature transaction.

2. Prompt the cardholder to select either 'Credit' or 'Debit' (commonly referred to as "Credit/Debit Prompting merchants"). In this situation:

- **Credit** – means perform a Signature Debit transaction
- **Debit** – means perform a PIN Debit transaction

This section describes how to perform Application Selection for EMV U.S. Debit so that the routing choice of the merchant is retained, and the expected cardholder verification is performed based on merchant and/or cardholder preferences. This section has been split between; PIN Preferring merchants and Credit/Debit Prompting merchants.

2.3   PIN Preferring Merchants:

The following assumptions have been made when describing the U.S. Debit Application Selection process for PIN Preferring Merchants:

1. Solutions supporting U.S. Debit will have two kernel configurations:
    - **All CVM Configuration** – Terminal Capabilities (Tag 9F33) is set to support all CVMs the merchant wishes to support (e.g. PIN - offline/online, Signature and NO CVM).
    - **NO CVM Configuration** – Terminal Capabilities (Tag 9F33) is set to support only the NO CVM option.
2. When using a configurable kernel, the Terminal Type (Tag 9F35) and Additional Terminal Capabilities (Tag 9F40) values may remain the same regardless of the value used for Terminal Capabilities (Tag 9F33).
3. PIN Bypass is supported by all PIN supporting kernel configurations.
4. The payment application supports a NO CVM limit for all payment products.

The steps required to filter the Candidate List to fully support U.S. Debit are:

1. For each transaction the final amount for the transaction must be known prior to filtering the Candidate List.
2. Once the final amount is known and the Candidate List is created, the card type will be identified based on the list of AIDs in the Candidate List. There are two options:
    - The Candidate List does not contain any U.S. Common Debit AIDs – This is either an international or domestic credit card or an international debit card (USA Debit Test Cards 04, 06, 07, 15 and 16). In this case there are no additional steps required to filter the Candidate List and the application can continue to the Final Selection Process (section 1.4.3 below).
    - The Candidate List contains one or more U.S. Common Debit AIDs – This is a U.S. Debit card (USA Debit Test Cards 01, 02, 03, 05, 08, 09, 10, 11, 12, 13 and 14).
3. For U.S. Debit cards, the EMV POS Solution must determine which AIDs should remain in the Candidate List, based on the three scenarios described in Table 02 (above). Depending on the number of AIDs remaining in the Candidate List, one the following should be performed:
    - Candidate List only contains one AID – Continue to step 4.
    - Candidate List contains more than one AID – Continue to the Final Selection Process (section 1.4.3 below).
4. If the Candidate List only contains a single U.S. Common Debit AID, the EMV POS Solution must determine if the transaction is under or over the NO CVM limit:
    - Transaction is under the NO CVM limit – Set Terminal Capabilities (Tag 9F33) to "NO CVM Only Configuration" and continue with Final Selection Process (section 1.4.3 below).
    - Transaction is over the NO CVM limit – continue to step 5.

5. If the Candidate List contains a single U.S. Common Debit AID and the transaction is over the NO CVM limit for U.S. Debit, then set the Terminal Capabilities (Tag 9F33) to All CVM Configuration. Later during Cardholder Verification, the application will prompt for PIN and may allow the cardholder to bypass the PIN.

2.4   Credit/Debit Prompting Merchants:

The following assumptions have been made when describing the Application Selection process for merchants supporting Credit/Debit Prompting for U.S. Debit:

1. Solutions supporting U.S. Debit will have three kernel configurations:
   - **All CVM Configuration** – Terminal Capabilities (Tag 9F33) is set to support all CVMs the merchant wishes to support (e.g. PIN - offline/online, Signature and NO CVM).
   - **Signature and No CVM Configuration** – Terminal Capabilities (Tag 9F33) is set to support only Signature and the NO CVM option.
   - **NO CVM Configuration** – Terminal Capabilities (Tag 9F33) is set to support only the NO CVM option.

2. When using a configurable kernel, the Terminal Type (Tag 9F35) and Additional Terminal Capabilities (Tag 9F40) values may remain the same regardless of the value used for Terminal Capabilities (Tag 9F33).

3. PIN Bypass is supported in all PIN supporting kernel configurations.

4. The payment application supports a NO CVM limit for all payment products.

The steps required to filter the Candidate List to fully support U.S. Debit are:

1. For each transaction the final amount for the transaction must be known prior to filtering the Candidate List.

2. For each transaction the cardholder must select either Credit or Debit.

3. Once the final amount is known, the cardholder has selected either Debit or Credit, the Candidate List is created, the card type will be identified based on the list of AIDs in the Candidate List. There are two options:
   - The Candidate List does not contain any U.S. Common Debit AIDs – This is either an international or domestic credit card or an international debit card (USA Debit Test Cards 04, 06, 07, 15 and 16). In this case there are no additional steps required in relation to filtering the Candidate List and the application can continue to the Final Selection Process (section 1.4.3 below).
   - The Candidate List contains one or more U.S. Common Debit AIDs – This is a U.S. Debit card (USA Debit Test Cards 01, 02, 03, 05, 08, 09, 10, 11, 12, 13 and 14).

4. For U.S. Debit cards, the EMV POS Solution must determine which AIDs should remain in the Candidate List, based on the three scenarios described in Table 02 (above). For each of the scenarios described in Table 02 the AIDs to be removed from the Candidate List will also be based on the button selected by the cardholder (Credit/Debit):
   - **Credit Button Selected** – Remove all U.S. Common AIDs that share an IIN with a Global AID.
   - **Debit Button Selected** – Remove all Global AIDs that share an IIN with a U.S. Common AID.

   Depending on the number of AIDs remaining in the Candidate List, one the following should be performed:
   - Candidate List only contains one AID – Continue to step 5.

- Candidate List contains more than one AID – Continue to the Final Selection Process (section 1.4.3 below).

5. If the Candidate List only contains a single U.S. Common Debit AID, the EMV POS Solution must determine if the transaction is under or over the NO CVM limit:

- Transaction is under the NO CVM limit – Set Terminal Capabilities (Tag 9F33) to "NO CVM Only Configuration" and continue with Final Selection Process (section 1.4.3 below).

If the Candidate List only contains a single Global Debit AID, the EMV POS Solution must determine if the transaction is under or over the NO CVM limit:

- Transaction is under the NO CVM limit – Set Terminal Capabilities (Tag 9F33) to "NO CVM Only Configuration" and continue with Final Selection Process (section 1.4.3 below).
- If the Transaction is over the NO CVM limit – Continue to step 6.

6. If the Candidate List contains a single U.S. Common Debit AID and the transaction is over the U.S. Debit CVM limit for U.S. Debit, the following should be performed:

- Transaction is over the NO CVM limit – Set Terminal Capabilities (Tag 9F33) to "All CVM Configuration" and continue with Final Selection Process (section 1.4.3 below). PIN Bypass may still be allowed during EMV Cardholder Verification.

If the Candidate List contains a single Global Debit AID and the transaction is over the NO CVM limit for the Global Debit AID, the following should be performed:

- Transaction is over the NO CVM limit – Set Terminal Capabilities (Tag 9F33) to "All CVM Configuration" and continue with Final Selection Process (section 1.4.3 below). As the transaction is over the NO CVM limit and the only CVM supported by the terminal is Signature - the application should print a signature line on the receipt.

2.5   Final Selection Processing

Once the Candidate List has been built and U.S. Common Debit processing has been performed. Final Selection can begin. During this process the AID to be used for the transaction is selected.

If the Candidate List only contains one AID it is automatically selected, Final Selection ends and Cardholder Application Confirmation may be performed.

- Cardholder Application Confirmation is only required when the Application Priority Indicator - Cardholder Confirmation Indicator (Tag 87 bit-8) is set to '1'.
- If cardholder confirmation is required, the cardholder must be prompted to confirm that the application may be used. To do this the Application Preferred Name (Tag 9F12) or the Application Label (Tag 50) is displayed to the cardholder who must then confirm the selection.

If the Candidate List contains two or more mutually supported applications (AIDs), the application list should be presented to the cardholder for selection. However, EMV POS Solutions may auto-select the U.S. Common Debit AID (if present). In a Credit/Debit Prompting configuration, Application Selection may occur after Credit/Debit Selection. This means that it may be necessary to prompt again for Credit or Debit based on the Application Label or Preferred Name of the AIDs in the candidate list.

When presenting the Candidate List for selection, the application names may be displayed all on one screen or with one application name per screen, using navigation buttons to traverse the list (e.g. 'Next' and 'Previous'). Regardless of the method used to display the Candidate List, the

application names displayed are determined as follows:

- Display the Application Preferred Name (Tag 9F12) if it is stored in a character set supported by the display. This can be determined by checking the Issuer Code Table Index (Tag 9F11). A value of '1' indicates that the Application Preferred Name is encoded using the Latin character set (i.e. contains standard English alphabetic characters).

Display the Application Label (Tag 50) if the Application Preferred Name is not present or cannot be displayed.

If the Application Preferred Name and Application Label are not present or cannot be displayed, display a default' application name assigned to the AID by the EMV POS Solution.

Once the AID to be used for the transaction has been chosen, the kernel may relay the application information back to the payment' application, so the following can be performed:

Set the Terminal Capabilities (Tag 9F33) – This will be based on the NO CVM limit for the card type based on the merchant environment (Credit/Debit) or PIN Preferring and the AID that has been selected (either the "All CVM Configuration", "Signature and NO CVM Configuration" or the "NO CVM Only Configuration"):

Global Debit AID:

- Transaction is over the NO CVM limit:
- PIN Preferring Merchant - Select the "All CVM Configuration"
- Credit/Debit Prompting Merchant – Select the "Signature and NO CVM Configuration"
- Transaction is under the NO CVM limit (for both PIN Preferring and Credit/Debit) – Select the "NO CVM Only Configuration"

U.S. Common Debit AID:

- Transaction is over the NO CVM limit (for both PIN Preferring and Credit/Debit) - Select the "All CVM Configuration"
- Transaction is under the NO CVM limit (for both PIN Preferring and Credit/Debit) – Select the "NO CVM Only Configuration"

Set the Processing Code:

- International/Global AID selected – a credit Processing Code should be used
- U.S. Common Debit AID, Interlink, Maestro or Interac selected – a debit Processing Code should be used

The kernel can now select the AID on the chip and Final Selection ends.

In some implementations it may not be feasible to perform cardholder Application Selection. For these cases, an EMV transaction should not be performed if the chip card contains multiple applications, unless there is a method to inform the cardholder which application is being used.

2.6   U.S. Debit Processing Flowchart PIN Preferring Merchants

B2»
2.7 U.S. Debit Processing Flowchart - Credit/Debit Prompting Merchants
Chapter 3 -   USA Debit EMV Test Plan

3.1   Test Case Outline

To perform the tests defined in this section you will require the USA Debit EMV Test Card Set provided by B2. The card numbers ('TCxx') used throughout will be consistent with that set. See <u>USA Debit EMV Test Card Set Profiles</u> in this document.

Types of Merchant Configuration include:
- PIN Preferring (PP)
- Credit/Debit Prompting (CD)

For test cards that have more than one AID, Application Selection methods include:
- Merchant-Controlled Candidate List (MCCL)
  Also referred to as 'filtering the candidate list' in the Chapter 2, entitled Implementing U.S. Debit
- Standard EMV Application Selection (SEAS)

Note - the short forms (in brackets, above) will be used in the naming of test cases.

Test cases are organized into categories by 'Merchant Configuration'.
The test cases for each of these cards are ordered according to type of merchant and (where applicable) the method used to select the application (where the card has more than a single AID).

3.2   Selecting Applicable Test Cases

The test cases have been organized into four categories based on merchant configuration. Users of this document should select the relevant configuration and only use test cases applicable to that configuration:
- <u>PIN Preferring, Merchant Controlled Candidate List</u>
- <u>PIN Preferring, Standard EMV Application Selection</u>
- <u>Credit/Debit Prompting, Merchant Controlled Candidate List</u>
- <u>Credit/Debit Prompting, Standard EMV Application Selection</u>

3.3   USA Debit EMV Test Cases

Important Assumption: All EMV Floor limits are set to $0.00.

Important Notes:
- When the application prompts for Cashback, outcomes (Approval / Declined) may differ from one terminal configuration or host to another. It is advised that, if possible, Cashback be disabled.
- Interac Flash cards have a '1xxxxx' BIN range. These cards are supported by all Canadian processors but are not yet supported by all U.S. and international processors. Check with your acquirer account representative to determine if the Interac Flash BIN range is supported by their development host. If your processor does not yet support Interac Flash, the card will function properly at the POS but it will not obtain a host approval.

The format used for the Test Case naming is as follows.

DD*.*AAAA*.C*xx*-T*yy, where:
- ***DD*** is:

PP - PIN Preferring
CD - Credit/Debit

- *AAAA* is:
   MCCL - Merchant Controlled Candidate List)
   SEAS - Standard EMV Application Selection
- C*xx* is:
   The Card Number (01-16)
- T*yy* is:
   The Test Number (resets to "01" for each card)

e.g.

PP.MCCL.C01-T01 – uses USA Debit Test Card 01 and would be run if the merchant is PIN Preferring and uses the Merchant-Controlled Candidate List method to choose the application. In this category there are four test cases and T01 is the first test case.

CD.SEAS.C03-T05 – uses USA Debit Test Card 03 and would be run if the merchant supports Credit/Debit Prompting and uses the Standard EMV Application Selection method to choose the application. In this category there are five test cases and T05 is the fifth test case.

3.3.1   Test Case ID and Title

PP.MCCL.C01-T01   PIN Preferring, Merchant Controlled Candidate List Card 01, Test 01

The first section is the Test Case ID followed by the test Title. The Title is intended to be as brief and concise as possible. In some situations, the test case Purpose and the test case number and suffix are required to distinguish the test from other similar test cases.

3.3.2   Type

Type: Contact

The second section identifies the test case Type. Two Types are supported – 'Contact' and 'Contactless'

3.3.3   Purpose

Purpose: Test that when a Visa card with more than one AID is inserted, the application: 1.   Does <u>not</u> prompt for Credit or Debit 2.   Does <u>not</u> prompt for Application Selection 3.   Automatically selects the 'US Debit' AID

The third section is the test case Purpose – this defines what is being tested by the test case.

3.3.4   Pre-Requisites

Pre-Requisites:
1.   Application is configured as PIN Preferring
2.   Application Selection is Merchant Controlled Candidate List
3.   Terminal supports the following AIDs: A0000000031010, A0000000980840

The fourth section identifies any Pre-Requisites that must be completed prior to running the test case. Each test Type will have a standard set of pre-requisites, documented at the beginning of the test section.

3.3.5   Steps

Steps:
1.   Start a Purchase transaction for $10.00
2.   When prompted for card entry, insert Test Card xx

The fifth section contains the Steps required to run the test case. Each step is a simple one action process. In most cases, only the steps applicable to the test being performed are documented, not all steps required to run the complete transaction.

3.3.6   Pass Criteria

Pass Criteria:
1.   "Chip" – indicates the card was inserted
2.   "A0000000980840" – AID selected was 'US Debit'

The sixth section identifies the test case Pass Criteria. This may range from a simple prompt or message on a screen, to contents of a receipt. Receipt information shown is required, but the exact receipt text may differ based on your specific merchant implementation and/or processor requirements.

3.3.7   Comments

Comments:

The last section identifies any general Comments. This section is intended to provide guidance or information that does not fit easily into any of the sections above. For most test cases this section is blank.

3.3.8 Complete list of AIDs used in USA Debit EMV Test Card Set

AIDs that should be loaded in the acceptance device when testing using the USA Debit EMV Test Plan are seen in the table below.

Cards 01 - 11 contents: Application AID, Credit/Debit, Label, PAN

Card	Application 1	Application 2	Application 3	Application 4
01	A0000000031010	A0000000980840		
	Debit	Debit		
	Visa Debit	US Debit

3.3.9   PIN Preferring, Merchant Controlled Candidate List – Test Cases

3.3.9.1   PP.MCCL.C01-T01

PP.MCCL.C01-T01	PIN Preferring, Merchant Controlled Candidate List Card 01 - Test 01

Type: Contact

Purpose:

Test that when a Visa card with more than one Debit AID is inserted, the application:

1. Does <u>not</u> prompt for Credit or Debit

2. Does <u>not</u> prompt for Application Selection

3. Automatically selects the 'US Debit' application

4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as PIN Preferring

2. Application Selection is Merchant Controlled by filtering the Candidate List

3. Terminal supports the following AIDs: A0000000031010, A0000000980840

Steps:

1. Start a Purchase transaction for $10.00

2. When prompted for card entry, insert Test Card 01

3. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is <u>not</u> prompted to select 'Credit' or 'Debit'

2. User is <u>not</u> prompted to select an application

3. The 'US Debit' application is automatically selected

4. The transaction is approved

5. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A0000000980840" – AID selected was 'US Debit'
    c. "0135" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

Comments:

3.3.9.2   PP.MCCL.C01-T02

PP.MCCL.C01-T02	PIN Preferring, Merchant Controlled Candidate List Card 01 - Test 02

Type: Contact

Purpose:

Test that when a Visa card with more than one Debit AID is inserted, the application:

1. Does <u>not</u> prompt for Credit or Debit
2. Does <u>not</u> prompt for Application Selection
3. Automatically selects the 'US Debit' application
4. Allows the user to bypass PIN entry

Pre-Requisites:

1. Application is configured as PIN Preferring
2. Application Selection is Merchant Controlled by filtering the Candidate List
3. Terminal supports the following AIDs: A0000000031010, A0000000980840
4. PIN Bypass is supported

Steps:

1. Start a Purchase transaction for $10.00
2. When prompted for card entry, insert Test Card 01
3. When prompted for PIN, press Enter/Cancel to bypass PIN entry

Pass Criteria:

1. User is <u>not</u> prompted to select 'Credit' or 'Debit'
2. User is <u>not</u> prompted to select an application
3. The 'US Debit' application is automatically selected
4. When a PIN is not entered, transaction continues with No CVM or Signature
5. The transaction is approved
6. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A0000000980840" – AID selected was 'US Debit'
    c. "0135" – last 4 digits of the PAN
    d. "No signature required" or "Signature panel" – No CVM or Signature CVM was used

Comments:

3.3.9.3 PP.MCCL.C01-T03

PP.MCCL.C01-T03	PIN Preferring, Merchant Controlled Candidate List Card 01 - Test 03

Type: Contactless

Purpose:

Test that when a Visa card with more than one Debit AID is tapped, the application:

1. Does <u>not</u> prompt for Credit or Debit
2. Does <u>not</u> prompt for Application Selection
3. Automatically selects the 'US Debit' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as PIN Preferring
2. Application Selection is Merchant Controlled by filtering the Candidate List
3. Terminal supports the following AIDs: A0000000031010, A0000000980840
4. Contactless CVM Floor limit is $0

Steps:

1. Start a Purchase transaction for $10.00
2. When prompted for card entry, tap Test Card 01
3. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is <u>not</u> prompted to select 'Credit' or 'Debit'
2. User is <u>not</u> prompted to select an application
3. The 'US Debit' application is automatically selected
4. The transaction is approved
5. Receipt shows:
    a. "Contactless" – indicates card was tapped
    b. "A0000000980840" – AID selected was 'US Debit'
    c. "0135" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

Comments:

PP.MCCL.C01-T04	PIN Preferring, Merchant Controlled Candidate List Card 01 - Test 04

Type: Contactless

Purpose:

PP.MCCL.C06-T02	PIN Preferring, Merchant Controlled Candidate List Card 06 - Test 02

Type: Contact

Purpose:

Test that when a Maestro card with more than one Maestro AID is inserted, the application:

1. Prompts the user for Application Selection by displaying 'Maestro1' and 'Maestro2'
2. Allows the user to select the 'Maestro2' application
3. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as PIN Preferring
2. Application Selection is Merchant Controlled by filtering the Candidate List
3. Terminal supports the following AID: A0000000043060

Steps:

1. Start a Purchase transaction for $20.00
2. When prompted for card entry, insert Test Card 06
3. Select 'Maestro2' application when prompted
4. Enter PIN ("4315") when prompted

Pass Criteria:

1. User is <u>not</u> prompted to select 'Credit' or 'Debit'
2. User is prompted to select 'Maestro1' and 'Maestro2'
3. User is able to select 'Maestro2'
4. The transaction is approved
5. Receipt shows:
    a. "Chip" – indicates card was inserted
    b. "A0000000043060D0562222" – AID selected was 'Maestro2'
    c. "2028" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

4. The transaction is approved

5. Receipt shows:
    a. "Chip" – indicates card was inserted
    b. "A0000001523010" – AID selected was 'Discover Debit'
    c. "0005" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

Comments:

3.3.10.44   PP.SEAS.C12-T04

PP.SEAS.C12-T04	PIN Preferring, Standard EMV Application Selection Card 12 - Test 04

Type: Contact

Purpose:

Test that when a Discover card with more than one Debit AID is inserted, the application:

1. Does <u>not</u> prompt for Credit or Debit

2. Prompts the user for Application Selection by displaying 'US Debit' and 'Discover Debit'

3. Allows the user to select the 'Discover Debit' application

4. Allows the user to bypass PIN entry

Pre-Requisites:

1. Application is configured as PIN Preferring

2. Application Selection is Standard EMV Application Selection

3. Terminal supports the following AIDs: A0000001524010, A0000001523010

4. PIN Bypass is supported

Steps:

1. Start a Purchase transaction for $79.00

2. When prompted for card entry, insert Test Card 12

3. Select 'Discover Debit' application when prompted

Pass Criteria:

1. User is <u>not</u> prompted to select 'Credit' or 'Debit'

2. User is prompted to select 'US Debit' and 'Discover Debit'

3. User is able to select 'Discover Debit'

4. The transaction is approved

5. Receipt shows:
    a. "Chip" – indicates card was inserted
    b. "A0000001523010" – AID selected was 'Discover Debit'
    c. "0005" – last 4 digits of the PAN
    d. "No signature required" or "Signature panel" – No CVM or Signature CVM was used

Purpose:

Test that when a Visa card with only the Interlink AID is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')
2. Does not prompt for Application Selection
3. Automatically selects the 'Interlink' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Merchant Controlled by filtering the Candidate List
3. Terminal supports the following AID: A0000000033010

Steps:

1. Start a Purchase transaction for $10.00
2. When prompted for card entry, insert Test Card 04
3. When prompted, select 'Debit'
4. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is not prompted to select an application
3. The 'Interlink' application is automatically selected
4. The transaction is approved
5. Receipt shows:
   a. "Chip" – indicates the card was inserted
   b. "A0000000033010" – AID selected was 'Interlink'
   c. "0671" – last 4 digits of the PAN
   d. "Verified by PIN" – PIN CVM was used

3.3.11.28   CD.MCCL.C11-T02

CD.MCCL.C11-T02	Credit/Debit Prompting, Merchant Controlled Candidate List Card 11 - Test 02

Type: Contact

Purpose:

Test that when a Mastercard Debit card with 2 pairs of U.S. Debit AIDs is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')
2. Prompts the user for Application Selection by displaying 'US Checking' and 'US Savings' only
3. Allows the user to select the 'US Checking' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Merchant Controlled by filtering the Candidate List
3. Terminal supports the following AIDs: A0000000041010, A0000000043060 and A0000000042203

Steps:

1. Start a Purchase transaction for $20.00
2. When prompted for card entry, insert Test Card 11
3. When prompted, select 'Debit'
4. Select 'US Checking' application when prompted
5. Enter PIN ("4315") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is prompted to select 'US Checking' and 'US Savings' only
3. User is able to select 'US Checking'
4. The transaction is approved
5. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A000000004220301" – AID selected was 'US Checking'
    c. "0060" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

CD.SEAS.C09-T03   Credit/Debit Prompting, Standard EMV Application Selection
Card 09 - Test 03

Type: Contact

Purpose:

Test that when a Mastercard card with a Credit AID and more than one Debit AID is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')

2. Prompts the user for Application Selection by displaying all of the following applications: 'Mastercard', 'Maestro' and 'US Maestro'

3. Allows the user to select the 'US Maestro' application

4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting

2. Application Selection is Standard EMV Application Selection

3. Terminal supports the following AIDs: A0000000041010, A0000000043060 and A0000000042203

Steps:

1. Start a Purchase transaction for $20.00

2. When prompted for card entry, insert Test Card 09

3. When prompted, select 'Debit'

4. Select 'US Maestro' application when prompted

5. Enter PIN ("4315") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'

2. User is prompted to select all of the following applications: 'Mastercard', 'Maestro' and 'US Maestro'

3. User is able to select 'US Maestro'

4. The transaction is approved

5. Receipt shows:
   a. "Chip" – indicates the card was inserted
   b. "A0000000042203" – AID selected was 'US Maestro'
   c. "0051" – last 4 digits of the PAN
   d. "Verified by PIN" – PIN CVM was used

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Standard EMV Application Selection
3. Terminal supports the following AID: A0000001524010

Steps:

1. Start a Purchase transaction for $79.00
2. When prompted for card entry, insert Test Card 13
3. When prompted, select 'Credit'

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is not prompted to select an application
3. The 'US Debit' application is automatically selected
4. The transaction is approved
5. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A0000001524010" – AID selected was 'US Debit'
    c. "0005" – last 4 digits of the PAN
    d. "Signature panel" or "No signature required" – Signature or No CVM was used

Comments:

3.3.12.43   CD.SEAS.C14-T01

CD.SEAS.C14-T01	Credit/Debit Prompting, Standard EMV Application List Card 14 - Test 01

Type: Contact

Purpose:

Test that when a DNA card with only one Debit AID is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')
2. Does not prompt for Application Selection
3. Automatically selects the 'DNA' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Standard EMV Application Selection
3. Terminal supports the following AID: A0000006200620

Steps:

1. Start a Purchase transaction for $10.00
2. When prompted for card entry, insert Test Card 14
3. When prompted, select 'Debit'
4. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is not prompted to select an application
3. The 'DNA' application is automatically selected
4. The transaction is approved *
5. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A0000006200620" – AID selected was 'DNA'
    c. "0028" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

Comments:

* Final disposition (Approved / Declined) is outside the scope of this document. For this test case to be successful, the transaction should go online but as the cryptogram doesn't need to be valid, the host may approve or decline.

B2

3.3.12.44   CD.SEAS.C15-T01

CD.SEAS.C15-T01	Credit/Debit Prompting, Standard EMV Application List Card 15 - Test 01

Type: Contact

Purpose:

Test that when an Interac Flash card with only one Debit AID is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')
2. Does <u>not</u> prompt for Application Selection
3. Automatically selects the 'Interac' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Standard EMV Application Selection
3. Terminal supports the following AID: A0000002771010

Steps:

1. Start a Purchase transaction for $30.00
2. When prompted for card entry, insert Test Card 15
3. When prompted, select 'Debit'
4. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is <u>not</u> prompted to select an application
3. The 'Interac' application is automatically selected
4. The transaction is approved
5. Receipt shows:
   a. "Chip" – indicates the card was inserted
   b. "A0000002771010" – AID selected was 'Interac'
   c. "8644" – last 4 digits of the PAN
   d. "Verified by PIN" – PIN CVM was used

Comments:

Account selection prompting (Chequing/Savings) is not a requirement for terminals deployed in the USA.

3.3.12.45   CD.SEAS.C16-T01

CD.SEAS.C16-T01	Credit/Debit Prompting, Standard EMV Application List Card 16 - Test 01

Type: Contact

Purpose:

Test that when an Interac card with only one Debit AID is inserted, the application:

1. Prompts for Credit and Debit (user selects 'Debit')
2. Does <u>not</u> prompt for Application Selection
3. Automatically selects the 'Interac' application
4. Prompts the user to enter a PIN

Pre-Requisites:

1. Application is configured as Credit/Debit Prompting
2. Application Selection is Standard EMV Application Selection
3. Terminal supports the following AID: A0000002771010

Steps:

1. Start a Purchase transaction for $30.00
2. When prompted for card entry, insert Test Card 16
3. When prompted, select 'Debit'
4. Enter PIN ("1234") when prompted

Pass Criteria:

1. User is prompted to select 'Credit' and 'Debit'
2. User is <u>not</u> prompted to select an application
3. The 'Interac' application is automatically selected
4. The transaction is approved
5. Receipt shows:
    a. "Chip" – indicates the card was inserted
    b. "A0000002771010" – AID selected was 'Interac'
    c. "1933" – last 4 digits of the PAN
    d. "Verified by PIN" – PIN CVM was used

Comments:

Account selection prompting (Chequing/Savings) is not a requirement for terminals deployed in the USA.

Chapter 4 -   USA Debit EMV Test Card Set Profiles

	CAUTION
	Multiple consecutive incorrect PIN entry attempts may result in the card being blocked.

CAUTION

Multiple consecutive incorrect PIN entry attempts may result in the card being blocked.
This is known as being 'PIN Blocked'.
If this occurs, it will no longer be possible to enter an Offline PIN,
which will cause all future transactions to be declined.

*** It is not possible to unblock a 'PIN Blocked' card ***

NOTICE

Interac Flash cards have a '1xxxxx' BIN range. These cards are supported by all Canadian processors but are not yet supported by all U.S. and international processors.

*** Check with your acquirer account representative to determine if the Interac Flash BIN range is supported by their development host. If your processor does not yet support Interac Flash, the card will function properly at the POS but it will not obtain a host approval. ***

This Test Card Set contains 16 cards with at least one card from each of the following card brands.
