Paytestprobe

The All-New Payment Testing Tool for Streamlined Payment Transaction Testing

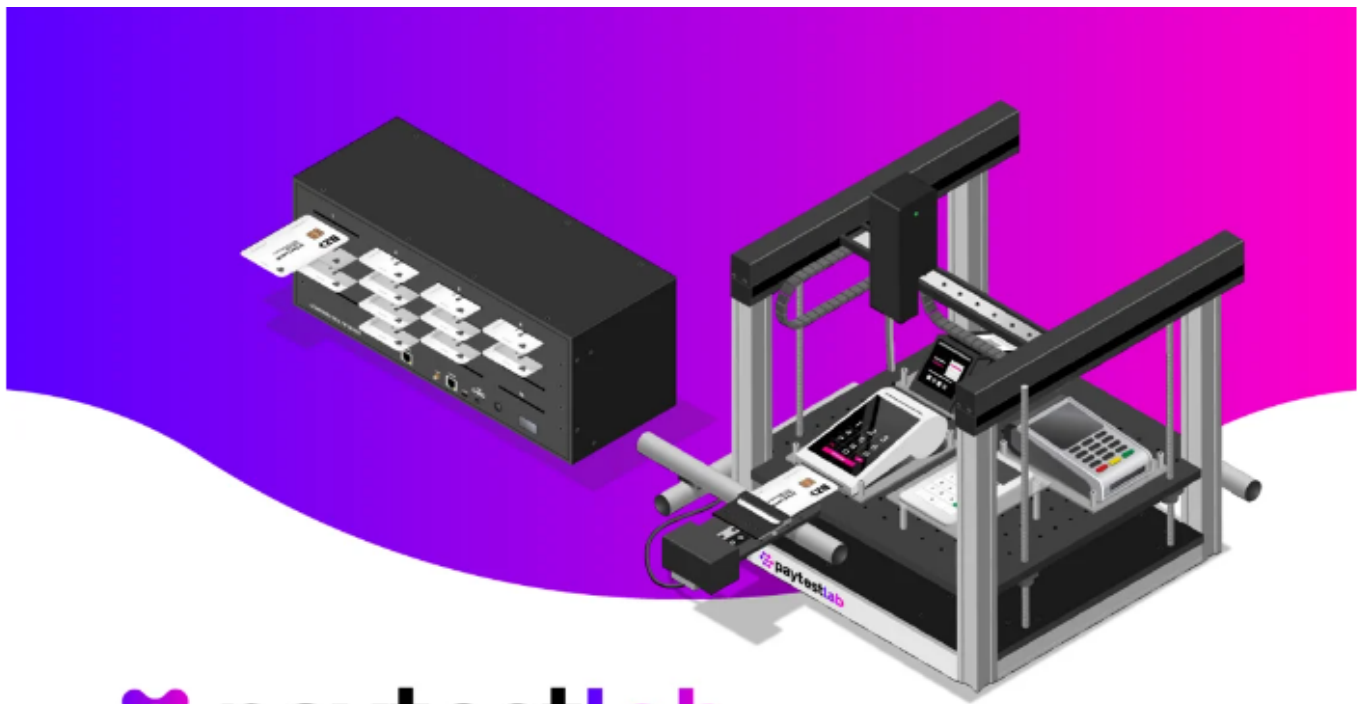

B2 is proud to introduce the launch of **Paytestprobe**, a device that brings payment testing to the next level. Standing as the central point of interaction between a terminal and a payment test tool, the Paytestprobe offers the ability to perform comprehensive testing scenarios without the use of physical test cards. The Paytestprobe simplifies and streamlines your testing processes by integrating with the ICC Solutions suite of tools as well as the Paytestlab Automated testing platform.

Don't miss out on the opportunity to secure your Paytestprobe as 2023 stock is limited! Pre-order now and enjoy an exclusive **20% discount**.

Click **Learn More** below to discover more about Paytestprobe or email us at info@paytestlab.com.

***This limited time offer ends on October 31th 2023. Orders are expected to be shipped out by mid-November.**

[Learn More](#)

Paytestlab is our cutting-edge platform and service designed to modernize payment software testing. It combines essential components, unrivaled expertise, and automation for a seamless testing experience.

Those who attended the MAG tradeshow earlier this month had the opportunity to see Paytestlab in action, witnessing firsthand how it transforms payment testing.

At its core, Paytest Hub, a cloud-based orchestration software, streamlines hardware management and test case execution with efficiency. It's adaptable and customizable to meet your specific needs.

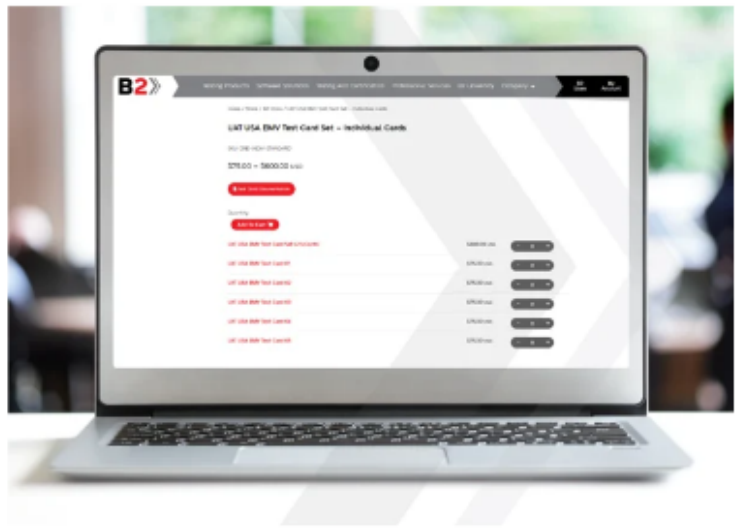

Learn more about Paytestlab in our feature sheet, or contact us to discuss options.

Test Card and Touchless Test Suite Cases Now Available

Packaging that goes Beyond the Norm

We are excited to announce that the B2 Test Card Cases and the Touchless Test Suite Case are now available for purchase in the B2 store!

Designed to provide convenient storage for your valuable items, these cases are the ultimate solution for those wanting to upgrade from our old test card binders and from our previous Touchless Test Suite packaging. Crafted with practicality as the priority, each case is compact and user-friendly, featuring a durable and modern design.

B2 Test Card Cases are available in 2 different sizes: one to accommodate up to 10 test cards, and the second that holds up to 22 test cards.

Discover our new and updated Test Card Cases and Touchless Suite packaging.
